LIGHTWEIGHT Braided Wire Protection

High-Performance Braided Shielding and Sleeving for EMI/RFI Screening and Mechanical Protection in Cable Assemblies

The world's most innovative line of metal, monofilament non-metallic, and microfilament composite and stainless steel braiding solutions for environmental, mechanical, and EMC shielding in interconnect cable assemblies

From high-temperature fiberglass tubular shielding for engine applications to ultra-lightweight EMI/RFI braided shielding for electrical wire interconnect grounding applications, Glenair offers the industry's most innovative range of solutions.

DuPont™ Nomex® and Kevlar® are trademarks or registered trademarks of E.I. duPont de Nemours and Company. All other referenced marks and brands are registered to, or possessions of, their respective owners and/or companies.

- Ultra lightweight solutions for weight-constrained applications such as aerospace and soldier systems
- A broad range of metallic and non-metallic material choices for every wire protection requirement
- Innovative microfilament braiding for 70% + weight reduction compared to standard QQB575 metal braids
- Innovative lightweight ground strap technologies
- New MasterWrap™ woven side-entry shielding
- Composite backshell/shield sock solutions

ArmorLite™ is an ultra-lightweight microfilament stainless steel EMI/RFI braided shielding. Available as tubular sleeving as well as direct factory overbraiding for point-to-point and multi-branch interconnect assemblies.

LIGHTWEIGHT

ARMORLITE™

Microfilament nickel-clad expandable stainless steel EMI/RFI braided shielding

Save weight and money every time you fly! All-Up-Weight (AUW) has met its match: ArmorLite™ microfilament stainless steel braid saves pounds compared to standard QQ-B-575/A-A-59569 EMI/RFI shielding. ArmorLite™ is an expandable, flexible, high-strength, conductive stainless steel microfilament braid material designed for use as EMI/RFI shielding in high-performance wire interconnect systems. The principal benefit of ArmorLite™ is its extreme light weight compared to conventional nickel/copper shielding. By way of comparison, 100 feet of 5/8 inch ArmorLite™ is more than four pounds lighter than standard 575 A-A-59569 shielding. Plus, ArmorLite™ offers superior temperature tolerance compared to other lightweight tubular braided shielding including microfilament composite technologies.

- Ultra-lightweight EMI/RFI braided sleeving for high-temperature applications -80°C to +260°C
- Microfilament stainless steel: 70% lighter than NiCu A-A-59569/QQB575
- Outstanding EMI/RFI shielding and conductivity
- Aerospace environment qualified
- Superior flexibility and “windowing” resistance: 90 to 95% optical coverage
- 70,000 psi (min.) tensile strength
- Best performing metallic braid during lightning tests (IAW ANSI/EIA-364-75-1997 Waveform 5B)

LIGHTWEIGHT, FLEXIBLE ArmorLite™ Microfilament Braid for EMI/RFI Shielding Applications

ArmorLite™ Performance Test Matrix			
DESCRIPTION	REQUIREMENT	PROCEDURE	REPORT
Altitude test 27,000 ft (5 PSIA nom.)	2.5% min.	RTCA DO-160F, Table 4-1, Table 4-2 Category C temp. spec	ARM-103
Operating Temperature	-80°C to +260°C	(Shielding effectiveness 1000 hours)	ARM-103
Braid Resistivity test, Pre and Post	Test pre/post-5 cycles-minimal disparity per spec.	EIA-364-32D IAW AS85049	ARM-110/1
Surface Transfer Impedance	Transfer Impedance (10.0 kHz ~ 1.0 GHz)	IEC 62153-4-3 min. 90% optical coverage	GT-17-263
Shield Effectiveness test, Pre and Post	Screening Attenuation (0 ~ 4.00 GHz)	IEC 62153-4-4 min. 90% optical coverage	GT-17-263
Tensile/ Pull Strength	220 lbs. (min.). No anomalies within 8% - 10% of pre test for variable sizes	Glenair ATP- 183. 0 lbs. to 90 lbs, to 150 lbs, to 220lbs @ speed of 0.25 inches/min	ARM-105
Specific Gravity Test	8.2 (max) per ISO-1183	ASTM A580 (ref 316L Stainless Steel)	ARM-109
Lightning Current Test	Glenair Qual. Test Plan 191/ DC resistance/ voltage criteria per DO-160F Level for 3 sizes up to 30Ka.	ANSI/EIA-364-75-1977 Wave Form 5B SAE/ARP5416 Section 6.3 Waveform 1, 3 (1, 10MHz) and 5A	ARM-110 ARM-112
Vertical Flammability	Self extinguishing ≤ 2 sec. Burn length 0.1 inch. max. Dripping 0.0 seconds.	14 CFR part 25.853 (a) AMdT25-116 Appendix F Part I (a) (1) (ii)	ARM-101
Mass Loss and Collected Volatile Condensable Materials	Total Mass Loss (TML) ≤1.0% Collected Volatile Condensable Matl.(CVCM) ≤.1%	ASTM E-595	ARM-102
Salt Spray Test	DC Resistance IAW AS85049 .5 milliohm. No evidence of base metal on braid	ASTM B117-09 Sodium Chloride 5% 500 hrs.	ARM-100
Vibration Resistance	EAI Test Report 33247. DO160 section 8 Cat. R Vib. Curves E1	DO-160F RTCA/DO-160F, Section 9, Fig. 8-4. Curve E1. - 3 sizes - 3 hours on each axis.	ARM-111
Thermal Shock Cycling test and Resistivity	No adverse effects in visual inspection or resistance after 50 cycles	EIA-364-32D, Table 3 Test condition V -65°C to +175°C	ARM-113
Abrasion and Plating test	DC Resistance IAW AS 85049. Glenair internal QTR-003	ATP 180 20 continuous @ 6 cycles/min. over 3 arms with .030 radiused edges	ARM-107
Fluid Immersion Test	Material compatibility – see table below	Customer/AS4373D method 601 Mod	ARM-106
Flex Test	2 Cycles: starting 0° over vertical ctr. line across to 180° cycle. Total cycles of 25633	Glenair ATP 179	ARM-112

LIGHTWEIGHT, FLEXIBLE

ArmorLite™ Microfilament Braid for EMI/RFI Shielding Applications

Aircraft utilization study

ARMORLITE™ AIRCRAFT UTILIZATION ANALYSIS

Comparison of ArmorLite® lightweight microfilament braid to standard A-A-59569 Ni/Cu braid

ArmorLite™ lightweight EMI/RFI braided shielding is ideally suited for weight reduction efforts in Electrical Wire Interconnect Systems in aerospace applications

Length and Weight of NiCu Braid in Typical Commercial Aircraft			
Diameter (in)	Weight (Lb/ft)	Length (in)	weight (Lb)
0 - 0.25	0.02	12564.8	21.08
0.25 - 0.5	0.05	5259.3	21.17
0.5 - 0.75	0.07	1212.6	7.12
0.75 - 1.0	0.14	1437.4	16.88
1.0 - 1.5	0.18	467	7.05
Total weight			73.3

Weight Savings Using ArmorLite™ (Equivalent Lengths)				
Diameter (in)	Weight (Lb/ft)	Length (in)	Length in feet	weight (Lb)
0 - 0.25	.00507	12564.8	1047.07	5.309
0.25 - 0.5	.0097	5259.3	438.28	4.251
0.5 - 0.75	.0178	1212.6	101.05	1.737
0.75 - 1.0	.0256	1437.4	119.78	3.063
1.0 - 1.5	.0368	467	38.92	1.434
Total weight				15.794

Using ArmorLite™ in place of standard nickel-copper braid saves 54.6 pounds per system—up to 78% weight savings!

Aircraft Zone Typical Braid Utilization (length in inches)

- 70+% weight savings over NiCu braid
- Outstanding EMI/RFI shielding and conductivity
- Broad temperature range: -80°C to +200°C
- Highly corrosion resistant
- Superior flexibility and “windowing” resistance

NOTES

1. Material - 50% ArmorLite™ nickel-clad 316L stainless steel / 50% nickel plated copper.
S Option - 50% ArmorLite™ nickel-clad 316L stainless steel / 50% silver plated copper.
ArmorLite™ is a trademark of Glenair, Inc.
2. Specify length on purchase order. No minimums!

AmberStrand® is ultra-lightweight microfilament metal clad EMI/RFI composite braiding.

Glenair offers AmberStrand® users direct factory overbraiding services for point-to-point and multi-branch interconnect assemblies.

LIGHTWEIGHT

AmberStrand®

Composite metal-clad EMI/RFI expandable braided shielding

The smart way to reduce launch and flight weights in aerospace systems

For many applications, the cable shield is the most important element in controlling EMI. Unfortunately, metal shielding—especially when applied in multiple layers—can be extremely heavy. The opportunity to provide robust EMI shielding at a fraction of the weight is the principal advantage of composite thermoplastic EMI/RFI braid made from AmberStrand® material. Transfer impedance test reports demonstrate the effectiveness of the material compared to conventional metal solutions. So get smart! Reduce weight and save money with AmberStrand®

- Metal-clad EMI/RFI Shielding with a lightweight composite thermoplastic base material
- Highly conductive surface plating
- Reduce shielding weight up to 80% and more
- Reduce operation costs by permanently reducing launch and aircraft all-up weights
- Superior high frequency shielding compared to tinned and/or nickel plated copper
- Exceptional tensile strength: 590,000 psi (min)

LIGHTWEIGHT, FLEXIBLE

AmberStrand® Composite Braid for EMI/RFI Shielding Applications

The lightest weight EMI/RFI braid in the industry

103-026 AmberStrand® 100% Lightweight Composite Thermoplastic Nickel Plated EMI/RFI Braid		
Tensile Strength	590,000 psi (min)	ATP196 MOD
Operating Temperature	-80°C to +220°C	90% shielding effectiveness, 1000 hrs
Specific Gravity	1.45% (max)	ISO 1183
Thermal Cycling	No adverse effects in visual inspection or resistance after 50 cycles	-65°C to +200°C In accordance with ANSI/EIA-364-75-1997
Lightning Current	Glenair qualification test report 040607AMB	In accordance with ANSI/EIA-364-75-1997
Surface Transfer Impedance	Glenair qualification test report 040607AMB	IEC 96.1 A.5.5.3 method 2
Vertical Flammability	Self-extinguishing ≤ 2 sec. Burn length 0.1 in. max - Dripping 0.0 sec	14CFR part 25.853 (A) AMDT25-116 Appendix F Part I (a) (1) (ii)
Fungus Resistance Testing	28 day incubation test: No fungus growth	Mil-Std 810F, Method 508.5
Mass Loss And CVCM	1.0% max mass loss; .10% max CVCM	ASTM E595
Flex Test 50,000 Cycles	No tearing or visible damage	90° to 120° bend
Salt Spray 500 hrs.	DC Resistance IAW AS85049 .5 milliohms; no visible evidence of base metal on braid	ASTM B 117-03 Sodium Chloride 5%
Salt Fog SO ₂	No damage or adverse effects	ASTM G 85 Annex 4 200 hrs.
JP-8 (Mil-T-83133) Military Jet Aircraft Fuel (70°C)	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Skydrol Military Jet Aircraft Fuel (90°C)	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Hydraulic Fluid Mil-H-5606 (70°C)	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Silicate Ester Based Coolanol 25R (70°C)	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Polyalphaolefin Mil-C-87252 (70°C)	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Lubricating Oil Mil-L-23699 8 hrs. @ 150°C, followed by 72 hrs. @ 65°C	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Isopropyl Alcohol 8 hrs. @ 50°C followed by 72 hrs. @ 65°C	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Cleaner Fluid Mil-C-85570 8 hrs. @ 23°C followed by 72 hrs. @ 65°C	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
De-icer Fluid AMS-1432 8 hrs. @ 23°C followed by 72 hrs. @ 65°C	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
Fire Extinguishing foam 8 hrs. @ 23°C followed by 72 hrs. @ 65°C	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)
R-134 Refrigerant 8 hrs. @ 23°C followed by 72 hrs. @ 65°C	No fraying, DC resistance within limits (AS85049 paragraph 4.6.3)	Mil-STD 810F Method 504 (Modified)

AmberStrand® lightweight composite metal-clad microfilament braid is Glenair's lightest weight material for EMI/RFI shielding applications

LIGHTWEIGHT, FLEXIBLE

AmberStrand® Composite Braid

103-026 100% AmberStrand

EMI/RFI microfilament composite braided shielding

103-026 AMBERSTRAND® 100% COMPOSITE BRAID

AmberStrand®

- Electrically conductive
- Superior high-frequency shielding in high temperature applications
- Comparable shielding performance to 36 AWG tubular copper braid
- Lightweight, corrosion-free
- Weight savings up to 88% / foot compared to standard nickel-copper braid

INDUSTRY-STANDARD METALLIC EMI/RFI Braided Shielding

100-001 tin-plated copper braid

- Soft-drawn tin-plated copper braid
- EMI frequency effective from 10KHz to 1 GHz
- 150°C temperature tolerant
- 125 lbs. pull strength (.500 dia. braid)
- 48 hours salt spray corrosion resistant
- Good abrasion resistance

Industry-standard tin-plated copper braid is the workhorse material for EMI/RFI shielding in non-weight-sensitive military and commercial applications with a 10KHz to 1GHz effective range and good abrasion resistance.

937	.937 (23.8)	64	640	TBD	3.04

NOTES

1. Direct current ratings are given for information only. Values shown are for uninsulated braid in free air, at 30°C (86°F). Actual values will depend on permissible temperature rise, voltage drop and other conditions of service. Values should be de-rated if the braid is insulated or in close contact with other components.
2. Individual strands to be IAW ASTM-B33
3. Braid conforms to the requirements of A-A-59569
Copper - OHFC
Lanyard - Synthetic fiber

INDUSTRY-STANDARD METALLIC EMI/RFI Braided Shielding

100-002 silver/copper braid

- Soft-drawn silver-plated copper braid
- EMI frequency effective from 10KHz to 1 GHz
- 200°C temperature tolerant
- 125 lbs. pull strength (.500 dia. braid)
- Good corrosion resistance

Industry-standard silver-plated copper braid is a special-purpose material for EMI/RFI shielding with improved high-temperature tolerance compared to standard tin-plated copper braid. Typically used for temperature applications above 150°C, the material also offers a shiny, bright surface appearance.

100-002 TUBULAR METAL BRAID QQ-B-575B/A-A-59569 ASTM B298 DRAWN SILVER PLATED COPPER

2. Material/Finish:
 Braid - Copper/Silver plated IAW QQ-B-575B, ASTM298 Class C
 Lanyard - Synthetic fiber

INDUSTRY-STANDARD METALLIC EMI/RFI Braided Shielding 100-003 nickel/copper braid

100-003 TUBULAR METAL BRAID ASTM B355 CLASS 7 OFHC DRAWN NICKEL PLATED COPPER

How To Order				
Sample Part Number	100-003	A	203	L
Basic No.	Nickel/Copper Braid			
Wire Gage Code	A = 36 AWG B = 34 AWG C = 32 AWG (consult factory) D = 30 AWG (consult factory)			
Braid Diameter No.	See Tables I or II			
Lanyard Option	L = with lanyard Omit = no lanyard			

- Soft-drawn nickel-plated copper braid
- EMI frequency effective from 10KHz to 1 GHz
- 200°C temperature tolerant
- 125 lbs. pull strength (.500 dia. braid)
- 500 hours salt spray corrosion resistant

Highly conductive nickel-plated copper braid is preferred for its superior handling of temperature cycles above 150°C. Nickel plating is highly resistant to oxidation and will maintain an attractive appearance over time.

Actual values will depend on permissible temperature rise, voltage drop and other conditions of service. Values should be de-rated if the braid is insulated or in close contact with other components.
2. Material/Finish:
 Braid - Copper/Nickel plated IAW ASTM B355 Class 7 OFHC
 Lanyard - Synthetic fiber

INDUSTRY-STANDARD METALLIC EMI/RFI Braided Shielding

100-005 tin-plated copper-clad steel braid

- Soft-drawn tin-plated copper-clad steel braid
- Good H Field EMI frequency effectiveness
- 175°C temperature tolerant
- 175 lbs. pull strength (.500 dia. braid)
- 96 hours salt spray corrosion resistant
- Good abrasion resistance

Multilaminar tin-plated copper-clad steel braid is an extremely versatile material. The steel core provides a strong, high tensile strength base for the more conductive copper cladding. Exterior tin plating prevents oxidation and corrosion.

100-005 TUBULAR METAL BRAID DRAWN TIN-PLATED COPPER-CLAD STEEL

3. Material/Finish:
Braid - Tin-plated copper-covered steel ASTM B520
Lanyard - Synthetic fiber

INDUSTRY-STANDARD METALLIC EMI/RFI Braided Shielding

100-004 stainless steel braid

- Soft-drawn stainless steel braid
- Good H Field EMI frequency effectiveness
- 260°C temperature tolerant
- 225 lbs. pull strength (.500 dia. braid)
- 1000 hours salt spray corrosion resistant
- Abrasion resistant

ASTM A580 Stainless Steel braid is an extremely tough, flexible, and strong alternative to plated braiding solutions. The material is resistant to abrasion and will not rust or discolor over time. Ideally suited for both environmental and high-temperature applications that demand advanced corrosion protection.

100-004 TUBULAR METAL BRAID ASTM A580 DRAWN STAINLESS STEEL

CORROSION-FREE, HIGH-TEMP, LIGHTWEIGHT, FLEXIBLE, ArmorLite™ CF Microfilament Braid

103-126 stainless steel over copper EMI/RFI microfilament braided shielding

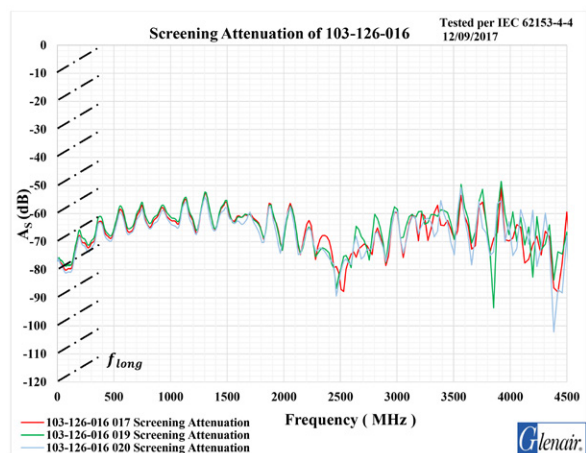

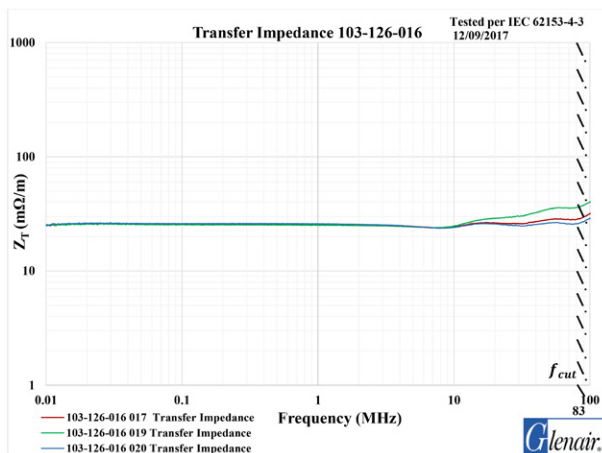

ARMORLITE™ CF LIGHTWEIGHT, CORROSION-FREE, TEMPERATURE-TOLERANT EMI/RFI BRAIDED SHIELDING

How To Order			
Sample Part Number	103	-126	-024
Product Code	Lightweight Braid Series		
ArmorLite™	-126 = ArmorLite™ CF		
Braid Diameter Dash Number	See Table		

ARMORLITE™ CF

- Broad temperature tolerance, -80°C to +400°C
- Corrosion / harsh environment resistant
- 1000 hour salt spray testing completed
- 70% reduced weight vs. standard braid
- Superb electrical resistance and shielding performance
- U.S. patent number US20200329594

Bulk tubular non-metallic braid for wire harness protection

102-051 PEEK tubular braid

- **Monofilament PEEK tubular braid**
- **-65° to +260°C temperature range**
- **13,000 PSI yield tensile strength**
- **38% elongation**
- **Excellent chemical resistance**
- **Excellent abrasion resistance**

102-051 PEEK TUBULAR BRAID (BLACK)

How To Order		
Sample Part Number	102-051	-008
Basic No.	PEEK tubular braid (black)	
Braid Diameter No.	See Table I	

Table I			
Part No.	Nominal I.D.	Wire Bundle Accommodation Range Ref.	
		Min.	Max.
-004	.125 (3.2)	.125 (3.2)	.187 (4.7)
-008	.250 (6.4)	.250 (6.4)	.360 (9.1)
-012	.375 (9.5)	.312 (7.9)	.430 (10.9)

-080	2.500 (63.5)	1.125 (28.6)	2.687 (68.2)

Polyether ether ketone (PEEK) is a popular composite thermoplastic material with outstanding high-temperature resistance, crush resistance, and flexibility. PEEK is typically specified in applications that require optimized weight reduction as well as abrasion resistance and zero halogen content.

NOTES

1. Material - Polyether ether ketone (PEEK) black. Operating temperature -70°C to +260°C

BRAIDED WIRE PROTECTION

Bulk tubular non-metallic braid for wire harness protection

102-060 FEP tubular braid

102-060 CLEAR FEP MONOFILAMENT TUBULAR BRAID

How To Order		
Sample Part Number	102-060	-008
Basic No.	Clear FEP monofilament braid	
Braid Diameter No.	See Table I	

- Monofilament FEP tubular braid
- -55° to +200°C temperature range
- 3,300 PSI yield tensile strength
- 50% elongation
- Excellent chemical resistance
- Good abrasion resistance
- Very low flammability

Dash No.	Nominal I.D.	Wire Bundle Accommodation Range Ref.	
		Min.	Max.
004	.125 (3.2)	.090 (2.3)	.250 (6.4)
008	.250 (6.4)	.125 (3.2)	.375 (9.5)
012	.375 (9.5)	.312 (7.9)	.430 (10.9)
016	.500 (12.7)	.250 (6.4)	.750 (19.1)
024	.750 (19.1)	.500 (12.7)	1.250 (31.8)
040	1.250 (31.8)	.750 (19.1)	1.500 (38.1)

FEP tubular braid is one of many non-metallic material choices available from Glenair selected for its high lubricity, and as a result its excellent resistance to abrasion. FEP is a high temperature material well-suited for both military and commercial transport applications. This clear variant of the FEP material is typically specified for systems where a clean appearance and/or the ability to visually inspect sub-material layers is valued.

NOTES

1. Material - monofilament (FEP) clear.
2. Temperature range -55°C to +200°C
3. Minimum order length is 100 ft. (30.5m)

-064	2.000 (50.8)	1.375 (34.9)	2.500 (63.5)

Non-metallic tubular braid, Kevlar®, earns much of its reputation for strength and abrasion resistance due to its construction from individual strands of yarn (as opposed to monofilament materials such as FEP and PEEK). 102-071 is Glenair's strongest non-metallic tubular braid material, and offers excellent resistance to caustic chemicals and fluids as well as wire interconnect protection at temperatures up to 160°C.

NOTES

1. Material - DuPont™ Kevlar®, natural or black.
DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. duPont de Nemours and Company.
2. Minimum order length is 100 ft. (30.5m)

BRAIDED WIRE PROTECTION

- Multifilament Nylon tubular braid
- -20° to +170°C temperature range
- 12,400 PSI yield tensile strength
- 20% elongation
- Excellent chemical resistance
- Excellent abrasion resistance

Multifilament Nylon is the workhorse of non-metallic tubular braid used for electrical wire interconnect system protection. It offers excellent abrasion resistance, general-duty resistance to fuels and chemicals, and is available in standard black or gray for identification of wire bundles. Nylon is an economical choice for most general-purpose applications.

NOTES

1. Material - Nylon per MIL-C-572 type P form Y
2. Minimum order length is 100 ft. (30.5m)

Bulk tubular non-metallic braid for wire harness protection

102-073 Black Dacron® tubular braid per MIL-C-572G

102-073 DACRON® TUBULAR BRAID (BLACK)

- Yarn Dacron® tubular braid
- -62° to +150°C temperature range
- 10,000 PSI yield tensile strength
- 12% elongation
- Good chemical resistance
- Good abrasion resistance
- Fire-resistant, will not melt

How To Order		
Sample Part Number	102-073	-008
Basic No.	Dacron® tubular braid (black)	
Braid Diameter No.	See Table I	

Table I			
Dash No.	Nominal I.D.	Wire Bundle Accomodation Range Ref.	
		Min.	Max.
-004	.125 (3.2)	.090 (2.3)	.250 (6.4)

-040	1.250 (31.8)	.750 (19.1)	1.500 (38.1)

Dacron® is similarly constructed to Glenair's 102-071 material. It is a multistrand yarn construction tubular braid with excellent tensile strength, durability and chemical resistance, albeit at a lower performance level compared to the costlier Kevlar.

NOTES

1. Material - Dacron® polyester per MIL-C-572G type PSTR forms C and Y
color - Black

B

- Monofilament Halar® tubular braid
- -65° to +150°C temperature range
- 7,000 PSI yield tensile strength
- 15% elongation
- Excellent chemical resistance
- Excellent abrasion resistance
- Very low flammability

Halar® is a self-extinguishing tubular braided sleeving used for mid-range temperature applications. Halar® is chemically resistant to corrosive liquids including organic solvents, and has been successfully applied to applications from nuclear power plants to premise wire interconnect protection systems.

NOTES

1. Material - Halar®
2. Maximum operating temperature +150°C
3. Minimum order length is 100 ft. (30.5m)

Bulk tubular non-metallic braid for wire harness protection

102-101 Ceramic tubular braid (Nextel™ 312)

102-101 CERAMIC TUBULAR BRAID (NEXTEL™ 312)

- Nextel™ 312 ceramic tubular braid
- Continuous use temperature 1200°C
- Low elongation and shrinkage at operating temperature
- Low moisture absorption
- Good chemical resistance
- Good abrasion resistance
- Fire-resistant, will not melt

How To Order		
Sample Part Number	102-101	-016
Basic No.	Ceramic tubular braid (Nextel 312)	
Braid Diameter No.	See Table I	

Table I: Size	
Dash No.	Nominal I.D.
-004	.125 (3.2)
-008	.250 (6.4)

-016	.500 (12.7)
-024	.750 (19.1)
-032	1.000 (25.4)

Nextel™ 312 tubular braid is composed of 312 grade continuous fiber that offers strength and flexibility, even in constant high temperature environments. Its properties include low thermal conductivity and thermal shock resistance, making it ideal for applications that require a flame barrier or thermal shield. It outperforms other high temperature textiles like aramids and fiberglass.

NOTES

1. Material - continuous Nextel™ 312 yarn is a ceramic fiber

- Soft, unbonded yarn, tubular braid, Nomex[®]
- -55° to +200°C temperature range
- 90,000 PSI yield tensile strength
- 25% elongation
- Excellent chemical resistance
- Good abrasion resistance
- Will not melt

General-duty abrasion-resistant unbonded yarn, Nomex[®] is well-suited for mechanical protection of soldier Personal Area Network cabling. Available in a broad range of colors, the soft, flexible, and durable material resists fraying and piling common to less robust yarns. In addition to improved flame resistance, unbonded braid, Nomex[®] offers superior flexibility compared to bonded solutions.

NOTES

1. Material - DuPont[™] Nomex[®] per MIL-C-572G, Type: PAA Form Y. DuPont[™] and Nomex[®] are trademarks or registered trademarks of E.I. duPont de Nemours and Company.
2. Minimum order length = 100 ft. (30.5m)

- Soft unbonded yarn tubular braid, Nomex[®]
- -60° to +240°C high-temperature tolerance
- 90,000 PSI yield tensile strength
- 25% elongation
- Excellent chemical resistance
- Good abrasion resistance
- Will not melt

103-106 unbonded tubular braid, Nomex[®] brings the same properties of our series 103-013 tubular braid, with superior temperature tolerance from -60°C to +240°C. Currently available in four colors—with tracer options for easy wire bundle identification—the soft unbonded material is ideally suited for a broad range of harsh-environment applications that depend on abrasion resistance and environmental performance.

NOTES

1. Material - DuPont[™] Nomex[®] per MIL-C-572G, Type: PAA Form Y. Nomex[®] to be 200 Denier, 6 ends, unbonded. DuPont[™] and Nomex[®] are trademarks or registered trademarks of E.I. duPont de Nemours and Company.
2. Lanyard material: Polyester Muletape #WP400N (300 lb.)
3. -GN color may vary from lot to lot, ranging from olive drab to forest green
4. Minimum order length = 100 ft. (30.5m)

- Outstanding resistance to fraying and piling
- Superior chemical resistance including solvents, hydraulic fluids, fuels, and lubricants
- -60° to +240°C temperature range
- 90,000 PSI yield tensile strength
- 25% elongation
- Good abrasion resistance

Bonded yarn, tubular braid, Nomex® brings all the same popular properties of our unbonded 103-013 tubular braid, adding superior abrasion performance, chemical resistance, and reduced fraying and piling compared to softer, unbonded solutions. Currently available in four colors with tracer options for easy wire bundle identification, the material offers temperature tolerance in a range from -60°C to +240°C.

NOTES

1. Material - DuPont™ Nomex® per MIL-C-572G, Type: PAA Form Y. Nomex® to be 200 Denier, 4 ends, bonded. DuPont™ and Nomex® are trademarks or registered trademarks of E.I. duPont de Nemours and Company.
2. Lanyard material: Polyester Muletape #WP400N (300 lb.)
3. -042 color may vary from lot to lot, ranging from olive drab to forest green
4. Minimum order length = 100 ft. (30.5m)

B

Bulk tubular non-metallic braid for wire harness protection

103-080 Camouflage tubular braid, Nomex[®], flame resistant

103-080 TUBULAR BRAID, NOMEX[®] - CAMOUFLAGE

103-080 Camouflage braid (M-Multicam shown)

-064	2.000 (50.8)	.937 (23.8)	2.187 (55.5)	12.6	

Ideally suited for applications as diverse as rail transportation, marine, and military vehicles, our 102-001 and -002 polyethylene tubular braid is an economical choice with good general-purpose chemical and abrasion resistance. The monofilament material offers wide expandability for quick and easy installation over cable bundles and connectors.

NOTES

1. Material - polyethylene terephthalate, .010 (0.25) dia.
2. Temperature range -54°C to +125°C

Bulk tubular non-metallic braid for wire harness protection

102-080 Ryton tubular braid

102-080 RYTON TUBULAR BRAID, NATURAL COLOR

- **Monofilament Ryton tubular braid**
- **-65° to +180°C temperature range**
- **19,000 PSI yield tensile strength**
- **40% elongation**
- **Excellent chemical resistance**
- **Excellent abrasion resistance**

How To Order		
Sample Part Number	102-080	-008
Basic No.	Ryton tubular braid	
Braid Diameter No.	See Table I	

Table I			
Part No.	Nominal I.D.	Wire Bundle Accommodation Range Ref.

102-080 Ryton is a versatile sleeving material used in mid-temperature applications. Ryton is a lightweight sleeving material with excellent chemical resistance and dimensional stability.

NOTES

1. Material - Ryton R-7, natural color (tan)
2. Minimum order length is 100 ft. (30.5m)

Bulk tubular non-metallic braid for wire harness protection

100-022 high-temperature range PTFE glass tubular braid

- Highly flexible PTFE-glass tubular braided sleeving with outstanding high- and low-temperature resistance (-200°C to +525°C)
- Ideally suited for rugged wire harness protection in proximity to engines and galleys
- Highly resistant to contaminants and toxic chemicals per ASTM D-570
- Smooth surface resistant to snagging and breakage

100-022 HIGH-TEMPERATURE PTFE-COATED FIBERGLASS BRAID, NATURAL COLOR

-040	1.250 (31.8)
-048	1.500 (38.1)

Glass-filled PTFE fire resistant braided shielding is ideally suited for cable protection adjacent high-heat engine applications

NOTES

1. Material - braided fiberglass, PTFE coated, natural color IAW MIL-C-20079H
2. Temperature range -200°C to +525°C
3. Minimum order length - 100 ft. (30.5m)

WITH ARMORLITE™ TECHNOLOGY

MasterWrap™ flexible, lightweight wraparound EMI/RFI shielding and abrasion protection

for spot EMI/RFI shielding coverage and repair of wire harnesses

- Up to 70% weight reduction compared to standard metallic EMI shielding
- Replaces harder-to-install tubular EMI/RFI sleeving
- Fast and easy side-entry installation and removal
- Reduces windowing and coverage gaps
- Superior flexibility, durability and reparability
- Temperature tolerant from -65°C to 260°C
- High-frequency EMI shielding performance comparable to standard metallic and lightweight tubular braid
- Outstanding abrasion and mechanical protection
- Halogen-free and RoHS compliant
- 500 hour salt spray corrosion resistance
- 50,000 cycle 90°-120° bend flex tested
- Outstanding caustic chemical and corrosive fluid resistance

Tubular braided sleeving meets the broad range of EMC shielding and mechanical protection requirements of aircraft harness assemblies. But the need to apply conductive shielding materials over installed aircraft wire and cable bundles requires new technology. Legacy self-wrapping cable braid has long been available for EMI/RFI applications and abrasion protection, albeit with poor performance due to its heavy weight, inflexibility, and “windowing,” which results in poor shielding performance. MasterWrap™, a lightweight, easy-to-install, side-entry, self-wrapping shielding solution—incorporating Glenair microfilament ArmorLite™ and composite thermoplastic PEEK fibers—solves these problems and more. MasterWrap™ is ideally suited for both long-run wire harness protection as well as spot coverage and maintenance of EMC cable applications—all with outstanding weight reduction and ease-of-assembly. MasterWrap™ is qualified for use at major aircraft manufacturers for both long cable runs and spot coverage and repairs.

MATERIAL CONSTRUCTION AND HANDLING PERFORMANCE

Flexible material eliminates kinking and windowing · Spring members ensure shielding stays tight to wire bundle

Ultra-lightweight microfilament stainless steel core, plated with conductive nickel for outstanding shielding performance

Interwoven with high-temperature PEEK composite thermoplastic spring members that ensure up to 95% optical coverage

- Material design provides uniform surface with limited interference to structures and clamps
- Provides optimum surface coverage and adherence to wire bundle without buckling during both straight and angled routing
- MasterWrap delivers increased abrasion protection with additional axial edge strength members compared to standard tubular braided shielding
- Reduces kinking and windowing compared to full metal braid solutions for excellent shielding performance

WITH ARMORLITE™ TECHNOLOGY

MasterWrap™ flexible, lightweight wraparound EMI/RFI shielding and abrasion protection for spot EMI/RFI shielding coverage and repair of wire harnesses

HERE'S WHAT YOU NEED TO KNOW ABOUT WEIGHT

Weight of standard metallic tubular braided cable shielding		
EMI Braided Shielding Type (measured samples all 1/2" diameter)	Weight g/ft	Weight g/m

Mechanical and Environmental Performance Summary		
Vibration	No evidence of wear or visible defect	DO-160G Cat S and H
Abrasion	No evidence of wear, visible defect or electrical degradation	EN-3475-511:2002
High Temperature Exposure	168 hours at 200°C; no visual or electrical degradation	EN 6059-302 part 302
Rapid Change of Temperature	10 hour hot and cold cycling; no evidence of wear or visible defect	EN 6059-308 part 308
Vertical Flammability	Pass	14 CFR part 25.853
Fluid Immersion Testing	No visual or electrical degradation	DO-160G
Bending Properties	25000 cycles; no breakage, no plating delamination	EN 6059-402
Salt Fog 500 Hours	No evidence of base metal on braid	ASTM B117-03 Sodium Chloride 5%

MasterWrap is compatible with most aerospace industry fluids. Consult factory for specifics.

WHAT YOU NEED TO KNOW ABOUT EMI/RFI SHIELDING PERFORMANCE

	NiCu	Armorlite™	Amberstrand®	MasterWrap™
TRANSFER IMPEDANCE (Per IEC 62153-4) (Max values for 1/2 inch diameter shields)				
FREQUENCY				
10 KHz	5 mΩ/m	50 mΩ/m	60 mΩ/m	40 mΩ/m
100 KHz	5 mΩ/m	50 mΩ/m	60 mΩ/m	40 mΩ/m
1 MHz	12 mΩ/m	50 mΩ/m	60 mΩ/m	40 mΩ/m
10 MHz	80 mΩ/m	50 mΩ/m	80 mΩ/m	40 mΩ/m
100 MHz	130 mΩ/m	30 mΩ/m	110 mΩ/m	80 mΩ/m
SHIELDING ATTENUATION (Per IEC 62153-4) (Min values for 1/2 inch diameter shields)				
FREQUENCY				
1 GHz	38 dB	55 dB	48 dB	40 dB
3 GHz	40 dB	60 dB	55 dB	35 dB
5 GHz	44 dB	60 dB	60 dB	45 dB
8 GHz	40 dB	50 dB	60 dB	40 dB
WEIGHT	70.9 g/m	14.4 g/m	12.1 g/m	20.3 g/m

The table at left is a useful summary of MasterWrap™ shielding performance compared to NiCu and lightweight braid. Transfer impedance and shielding attenuation data is supplied for 1/2" diameter test samples. At high frequencies, both LWB and MasterWrap™ provide comparable and even superior performance to nickel-copper due to reduced windowing and superior optical coverage with significant reduction in weight. Further improvements in high-frequency shielding attenuation can be achieved using conductive tape wraps and/or via hybrid blends of LWB and NiCu.

MasterWrap™ ArmorLite: flexible, lightweight wraparound EMI/RFI shielding

for long runs and spot coverage

MATERIAL/FINISH

Copper with Nickel, Silver, or Tin finish. 18° to 30°, 34 or 36 AWG, 85% minimum coverage

ArmorLite - Stainless Steel / Nickel plated

AmberStrand (A) - Composite / Nickel plated

AmberStrand (B) - Composite 75%, Nickel Copper 25%

Nickel 200 Tubular metal braid

Special-Purpose for Shipboard Applications

100-218

NICKEL 200 TUBULAR METAL BRAID

How To Order				
Sample Part Number	100-218	A	203	L
Basic No.	Nickel 200 tubular braid			
Wire Gage	A = 36 AWG B = 34 AWG C = 32 AWG D = 30 AWG			
Dash Number	See Tables I, II, III, IV, and V			
Lanyard Option	L = with Lanyard Omit for none			

Table I: 36 AWG

NOTES

Braid Material - Nickel 200 per ASTM B160

Minimum order length = 100 feet. For longer lengths, braid will be supplied in random lengths, number of reels and size mfg. option. Continuous lengths must be specified by customer.

103-173 adhesive shielding tape

- **Lightweight, conductive fabric with a conductive adhesive for optimal EMI shielding**
- **Conforms to NASA outgassing requirements without any special processing:**
Tested per ASTM E 595
TML: 0.27%
CVCM: <0.01%
- **80 dB shielding at high frequencies per IEC 62153-4-4**
- **Service temperature range -65°C to +125°C**
- **Meets the flammability requirements of FAR 25.853, 12 second vertical burn**
- **Use to shield critical EMC terminations under overmolds**
- **Use to shield an entire cable or to patch EMI holes**
- **Conductive adhesive secures the tape in place and sticks to itself, metallic braid, backshells, and connectors**
- **Ideal for holding Glenair MasterWrap in place**

Glenair 103-173 adhesive EMI shielding tape is an ideal solution for shielding of critical EMC terminations under cable overmolds, as a patch for on-site coverage of EMI holes, or as an EMC shielding solution for entire cables. The lightweight nickel-coated copper fabric is backed with a conductive, pressure-sensitive adhesive that secures the tape in place, and adheres to itself and to EWIS components. It is an ideal finishing solution for holding Glenair MasterWrap in place. Conveniently supplied in .5", 1", and 1.5" width on 25 yard rolls.

How To Order		
Sample Part Number	103-173	0.5
Basic No.	Adhesive EMI Shielding Tape	
Tape Width	0.5 = .50" wide tape 1.0 = 1.00" wide tape 1.5 = 1.50" wide tape Supplied in 25 yd. rolls, individually polybagged.	

**MECHANICAL CHARACTERISTICS**

- Nickel-copper plated fabric
- Conductive pressure-sensitive adhesive/
- Paper backing
- Weight: 1.2 g/ft (X width in inches)

SERIES 107

Braided Ground Straps

for electrostatic discharge, lightning strike and power equipment grounding

A single lightning strike can hit an aircraft with as much as 1,000,000 volts. Static electricity can charge an aircraft, particularly in cold and wet air, with enough electrical potential to result in a discharge that can ignite ground fueling equipment or fry avionics gear. Power generation systems (engines, alternators, starters, etc.) can also produce transient electrical current that can damage adjacent electronic systems.

Damage from these events is minimized and managed in aircraft, Navy ships, mass transit systems and elsewhere through the use of electrical bonding. Flexible bonding straps are attached between equipment and airframes as well as between structural elements and flight control surfaces to conduct destructive electrical surges to ground or to bus bar components capable of absorbing significant amounts of transient voltage

Glenair has designed and supplies a broad range of braided ground strap technologies to both commercial and military aerospace customers, as well as US Navy and a broad range of mass transit applications. Our ground strap technologies are exactly designed with appropriate conductive and dissipative materials for each application.

Lightweight microfilament ground strap with ArmorLite™ technology reduces aircraft all-up-weight

- Ultra-lightweight ground straps with highly conductive or dissipative performance
- Metal-clad microfilament braided solutions
- Significant contribution to weight reduction initiatives in commercial and military aircraft
- Heavy-duty variants for electrical potential grounding from engines, starters, and power units
- Mil-qualified designs for Navy shipboard applications
- Fast turnaround on requests for unusual and build-to-print requirements

Lightweight, general, and heavy-duty

LIGHTWEIGHT ARMORLITE™ MICROFILAMENT GROUND STRAPS

- Ultra lightweight metal-clad stainless steel braid material
- Low-profile lug design and assembly
- Available in seven widths and any length
- Low electrical resistance and high temperature tolerance
- High conductivity-to-weight / material-cross-section ratio
- Corrosion resistant materials for life-of-system durability
- Bend cycle durability up to 250,000 cycles per EN4199-001

GENERAL DUTY, CONFIGURABLE GROUND STRAPS

- Designed for general-purpose military and commercial aerospace as well as mass transit and industrial applications
- Nickel-plated copper lugs with configurable mounting hole options
- Broad range of standard-duty braid materials, including tin and silver-plated copper, stainless steel, and nickel 200
- Insulated sleeving option for environmental protection

MIL-DTL-24749 TYPE IV QUALIFIED GROUND STRAPS FOR NAVY SHIPBOARD APPLICATIONS

- Meets the rigorous specifications of MIL-DTL-24749 Rev. C Type IV
- Tested to survive 1000 hours salt spray
- Unique Stainless Steel/Nickel hybrid braid
- Available in six standard configurations, with non-standard length/ lug size configurations available
- Rugged square form-factor lug

FAST TURNAROUND ON UNUSUAL/BUILD-TO-PRINT REQUESTS

Hybrid braid materials and customizable lug material options

Specialized lug configurations including integrated bonding hardware and angled lugs

Heavy-duty braid and lug configurations

Round cross-section braid

Harsh environment and chemical-resistant ground strap jacketing

GROUND CONTROL EARTH BOND SYSTEM

How To Order		
600-120	Hydraulic Setting Tool for 1/4" Earth Bonds	The tools feature one hand operation and ram retract mechanism actuated by release trigger. Consult factory for control gauges and earth bond part numbers for each material type and size.
600-123	Hydraulic Setting Tool for 3/8" Earth Bonds	
600-124	Hydraulic Setting Tool for M6 Earth Bonds	
600-125	Hydraulic Setting Tool for M10 Earth Bonds	

WEIGHT-SAVING, LOW-PROFILE ArmorLite™ ESD Grounding Straps

Series 107 • Single and dual layer • soldered lugs

LIGHTWEIGHT ARMORLITE™ MICROFILAMENT GROUND STRAPS, SOLDERED LUGS

How To Order				
Sample Part Number	107-098	-A	-12	-6
Grounding Strap	-098 = Single layer light duty ArmorLite -099 = Dual layer medium duty ArmorLite			
Material	A = ArmorLite microfilament stainless steel braid			
Width Code	(See Table II)			
Length	Dimension (L) in one inch increment			

ARMORLITE™

- For grounding airframe sections, dissipating static build-up in composite structures, dissipating lightning strike energy, and grounding individual moving parts
- 70+% weight savings over standard NiCu braid
- Approved for use by major airframe and equipment manufacturers
- Lightweight, durable soldered lugs

 Sleeve: M23053/13, fluoroelastomer (Viton)

HARSH-ENVIRONMENT STAINLESS STEEL/NICKEL Qualified MIL-DTL-24749 Rev. C Type IV

Mil-qualified for shipboard applications

QPL MIL-DTL-24749 REV. C TYPE IV GROUND STRAPS

Glenair MIL-DTL-24749 Rev C Type IV ground straps solve harsh-environment shipboard corrosion and electrical resistance problems with a unique 50% Stainless Steel 316L / 50% Nickel 200 36AWG blend braid, and passivated Stainless Steel lugs. These US Navy-approved ground straps are qualified to the rigorous standards of M24749, and are tested beyond the mil-spec to survive 1000 hours salt spray. Allowed usages for Type IV straps can be found in MIL-STD-1310H.

How To Order					
Sample Part Number	M24749	-IV	-B	-L	-H
Product Series	MIL-DTL-24749 Rev. C Type IV bond strap				
Bond Strap Type	IV = Flat CRES 316 / Nickel 200 braid with mounting lugs				
Standard Size Code	A = 6.0" length; .90" width, .406 H dia. D = 6.0" length; .90" width, .281 H dia. B = 12.0" length, .90" width, .406 H dia. E = 12.0" length, .90" width, .281 H dia. C = 18.0" length, .90" width, .406 H dia. F = 18.0" length, .90" width, .281 H dia. N = for non-standard sizes				
Non-Standard Length	Non-Standard length in inches (omit for standard sizes)				
Hole Diameter	For non-standard length Size Code N only: .406 = 13/32" hole diameter .282 = 9/32" hole diameter Omit for standard sizes				

- Meets the rigorous specifications of MIL-DTL-24749 Rev. C
- Tested to survive 1000 hours salt spray
- Unique Stainless Steel/ Nickel hybrid braid
- Available in six standard configurations, with non-standard length/lug size configurations available

NOTES

1. Lugs are ink stamped or electro-etched per M24749 Rev. C Min. character height .06 (1.52)
2. Codes A – F are standard lengths. To order non-standard straps, enter Size Code **N**, enter **length** (in inches) in part number, and enter **0.406** or **0.281** for hole diameter.

MATERIAL/FINISH

Lugs - 316L Stainless Steel/Passivate
Braid - 316L Stainless Steel 36 AWG, 50%; 200 Nickel 36 AWG, 50%

Glenair MIL-DTL-24749 Rev. C Type IV Stainless Steel/Nickel Ground Straps: US Navy qualified and tested to survive extreme environments

NOTES

- Glenair Series 600 Assembly Tools are recommended for assembly and installation.
- Swing arm locks in 45° increments, shell size 09 through 25. Additional positioning increments are manufacturer's option.
- Screw is captive to the arm when disengaged. When tightened, the screw will not protrude into the inside surfaces.
- *Add Mod Code **-475** to end of part number for use with Series II connector. Backshell to be supplied less shroud.
- Metric dimensions (mm) indicated in parentheses.

MATERIAL/FINISH:

Clamp body, coupling nut, saddles - High grade thermoplastic/See Table III.
 Clamp hardware - CRES/Passivate
 Crimp ring - Copper/Tin plated.

Swing-Arm 3-in-1 lightweight composite backshell with integrated EMI/RFI shield sock

319-181 wide mouth for larger diameter cables

WIDE MOUTH COMPOSITE BACKSHELL WITH SHIELD SOCK AND SELF-LOCKING ROTATABLE COUPLING NUT

NOTES

- Assembly to be identified with manufacturer's name and part number as space permitted
 Glenair 600 series backshell assembly tools are recommended for assembly and installation.
 O-Ring supplied with connector designator F & H only
 O-Ring not supplied with connector designator A or with drain hole option
 Material/Finish:
- Coupling Nut, Adapter and Split Ring: High Temperature Engineering Thermoplastic (see Table II)
 - Follower: Brass/Electroless Nickel
 - O-Ring: Fluorosilicone/NA
 - Shrink Boot: see 770-001S** See Shrink Boot Product Page for Details
 - Band: SST/Passivated
 - Crimp Ring: Copper/Tin Plated
 - Braid: See Table III

XM	2000 Hour Corrosion Resistant Electroless Nickel
XMT	2000 Hour Corrosion Resistant NI-PTFE, Nickel-Fluorocarbon Polymer
XW	2000 Hour Corrosion Resistant Cadmium Olive Drab Over Electroless Nickel

Symbol	Braid Type
A	100% AmberStrand®
B	75%/25% AmberStrand® Blend
-	Nickel/Copper 34 AWG
T	Tin/Copper 34 AWG
L	Armorlite™
M	75%/25% ArmorLite™ Blend

Attribute	Type 1 High-Performance Semi-Rigid Elastomer	Type 2 Zero-Halogen Semi-Rigid Polyolefin	Type 3 General Purpose Flexible Polyolefin
Continuous Operating Temp.	-75° To +150° c-	30° To +135° c-	55° To 135° c
Resistance To Fuels, Oils	Excellent	Very Good	Good
Low Toxicity, Zero Halogen	No	Yes	No

MATERIAL / FINISH

Elbow, adapter: - High-grade engineering thermoplastic/see Table II
 Coupling nut, anti-decoupling device: high-grade engineering thermoplastic
 O-ring: silicone
 Braid: see table V
 Boot: see table IV
 Band: CRES

ASSEMBLY NOTES

Glenair 600-091 or 600-157 Series Backshell Assembly Tools are recommended for assembly and installation.
 O-Ring supplied with Connector Designator F & H only.
 O-Ring not supplied with Connector Designator A.

Lightweight composite environmental piggyback shrink boot adapter with integrated EMI/RFI shield sock

319-183

BAND-MASTER ATS® EMI/RFI Shield Termination System

The advanced termination system
for interconnect cable shielding

- Fast, cost-effective cable shielding termination
- Integrated digital counter aids in identifying calibration intervals
- Precision hand-held tool and bands deliver reliable, repeatable performance
- Single-piece stainless steel bands in various sizes and lengths
- Clamp both small and large diameters easily and reliably
- Pneumatic banding tool for high-speed mass production
- Qualified for both military and commercial programs

Band-Master ATS® provides quick, easy, cost-effective and reliable termination of braided shielding to connectors and backshells.

Band-Master ATS® is the advanced termination system for interconnect cable shielding. The unique low profile and smooth inside diameter of the one-piece stainless steel clamping band virtually eliminates RFI/EMI/EMP leakage paths. The lock maintains constant tension under extreme environmental conditions. Band-Master ATS® bands pass severe shock, vibration and thermal cycle testing with negligible deterioration of shell conductivity.

Band-Master™ ATS Manual Tool Selection

601-100	601-101	601-108	601-109
for Standard .24"W Bands Tension range 100 to 180 lbs. Calibrate at 150 lbs. ± 5 lbs.	for .12"W Micro Bands Tension range 50 to 85 lbs. Calibrate at 80 lbs ±5 lbs.	for .075"W Nano Bands Tension range 20 to 50 lbs. Calibrate at 50 lbs. ± 3 lbs.	for 24"W Slim Standard Bands Tension range 50 to 100 lbs. Calibrate at 100 lbs. ± 5 lbs.

3 lengths and 3 widths of EMI braid termination bands plus new slim standard bands for size and weight savings—50% lighter and lower-profile than standard bands.

Band-Master™ ATS Band Selection

Bands	Length		Part Number		Fits Diameter	
	in.	mm.	Flat	Pre-Coiled	in.	mm.

Utilizing ArmorLite™ pull-over braid

TOOLS AND MATERIALS:

- ArmorLite™ Braid (P/N 103-051)
- Split Rings
- Banding Straps
- Band-Master ATS® Hand Banding Tool
- Lace tie

Step 1: Place split rings onto assembly—two on the main leg and one on the breakout leg.

Step 2: Install a length of ArmorLite™ over the breakout leg. Flare the braid material out and over the main leg of the assembly and over the adjacent split ring. Spot tie in place.

Step 3: Position two separate lengths of ArmorLite™ on either side of the breakout and over the main leg of the assembly. Make a 2-inch cut in each respective length and overlap both pieces to surround the breakout leg and amply cover both split rings.

Step 4: Use lacing ties to secure all braid in place.

Step 5: Install a Band-Master ATS® Band over each termination area, exactly centered on split support rings.

IMPORTANT: Always roll band through the buckle slot twice (see coiled band in photo above). Bands must be double-coiled to function correctly. All Band-Master ATS® bands are available pre-coiled.

Shield Termination Assembly Procedure

- 1 Calibration Access Plug**
- 2 Tensioning Lever:**
Squeeze with short gentle strokes to tighten band to the proper tension. Lever will lock to
- 3 Handle** with final full stroke.
- 4 Cut-Off Lever:**
Squeeze to lock band buckle and trim excess band material.
- 5 Calibration Counter**
- 6 Band Insertion and Release Lever:**
Depress lever to insert or release band from tool.
- 7 Serial Number**
- 8 Tension Release Lever**

NOTES:

1. Use only genuine Band-Master™ ATS bands. Other manufacturer's bands may damage tool.
2. Use only .240" wide bands with 601-100 tool and .120" wide bands with 601-101 tool.

Step 1

Prepare Cable Braid for termination process
NOTE: Complete banding on an unfixtured cable assembly. Terminating a band to a clamped or fixtured cable will affect the applied forces and interfere with the cut-off operation. The cut-off operation causes a rotation of the band termination in order to lock the band.

Step 2

Push braid forward over banding platform. Milk braid as required to remove slack and ensure a snug fit around the shield termination area.

Step 3

Double-coil the band prior to use:
IMPORTANT: Due to connector/adaptor circumference, it may be necessary to double-coil the band in place around the cable or termination area.

- A. Loop/insert the leading edge of band through the buckle slot twice. (Bands *must* be double-coiled.)
- B. Tighten the coil until the indicator mark (▷) is approximately .250 inches (6.4) shy of the buckle slot (see illustration at left). This will ensure sufficient band tail length for insertion into tool.

Step 4

Depress the band insertion and release lever (6), and insert the working end of the band into the front end opening of the tool, with the loop positioned outward as shown.

Shield Termination Assembly Procedure (continued)

Step 5

The band termination area on all backshells is wider than the band. Position the band near the rear lip of the banding platform, allowing room for the buckle. For elliptical cable entries position the buckle off center of the peak of the circle. Failure to follow these guidelines will result in poor performance.

Position the band near the rear lip leaving room for buckle.

Step 6

Contract the band with the tensioning lever (2) using short, even strokes. As the band contracts firmly on the termination area, pull a full stroke to lock the lever against the main tool handle which will indicate the band is compressed to the proper tension.

NOTE: *Overly rapid tightening of the band may result in uneven compression. If alignment of the band and shield is unsatisfactory, tension can be relaxed by pulling up on the tensioning lever (2) and then pushing the tension release lever (8) forward. Make adjustments as necessary and finish tightening with tensioning lever (2) as described above. Instructional videos are available at www.glenair.com/banding/*

Step 7

Complete the clamping process by depressing the cut-off lever (4), allowing band and cable to rotate slightly. Pull up the release lever (6) to remove excess band for disposal.

NOTE: *Always band on an unfixtured connector/cable assembly.*

Step 8

Trim away excess braid from the forward groove, particularly if a shrink boot is to be applied to the assembly.

Step 9

Visually inspect shield termination for problems.

NOTE: *Band can be removed by lifting the buckle with a screwdriver or diagonal cutters.*

How To Order				
Sample Part Number	077-030	03	T	-6
Product Series	HST sleeve with pre-installed braid			
Size and Braid Material Type	See Tables I, II, and IV			
Thermal Indicator	T = with indicator Omit for none			
Braid Length	-6 = 6 inches, standard. Longer lengths available in 2" increments (-8, -10, -12...-24 [maximum 24"])			

- Designed to meet SAE AS83519 performance requirements
- Fabricated from transparent cross-linked polyvinylidene fluoride tubing for optimal environmental shield termination
- Pre-fluxed solder preform and thermally stabilized thermoplastic sealing rings to encapsulate and protect the shield-to-ground termination
- -55°C to 125°C temperature range IAW SAE AS83519

For best results prepare cable as shown

MATERIAL/FINISH:

- Insulation sleeve - Heat-shrinkable, radiation crosslinked, modified polyvinylidene fluoride per MIL-I-23053/8. Color - Translucent blue.
- Sealing ring - Thermally stabilized thermoplastic. Color - blue.
- Solder - Sn63 per ANSI-J-STD-006.
- Flux - ROM1 per ANSI-J-STD-004 (to be used on nickel plated shields only).
- Optional thermal indicator - changes from color to colorless.

APPLICATION:

- Temperature rating, Table I, III, IV: -55°C to +150°C, Cable jacket rating - 125° Min.
- Temperature rating, Table II: -55°C to +175°C, Cable jacket rating - 150° Min.
- Shield plating, Table I, IV: Tin or silver.
- Shield plating, Table II: Nickel.

077-030 Pre-installed braid pre-tinned on both ends

FLEXIBLE, LIGHTWEIGHT WRAPAROUND SHIELD BRAID

MasterWrap™
ARMORLITE™ SELF-WRAPPING WIRE PROTECTION SAVES TIME AND WEIGHT
SEPTEMBER 2013

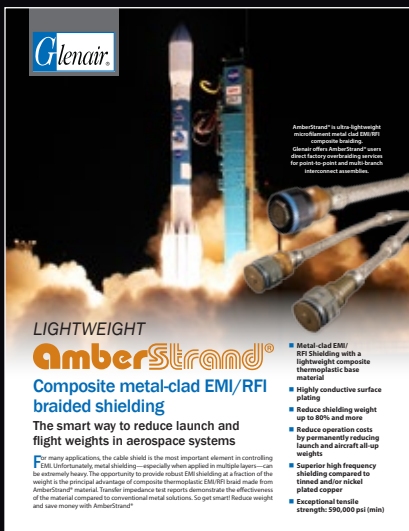

Glenair.

LIGHTWEIGHT ARMORLITE™
Microfilament nickel-clad stainless steel EMI/RFI braided shielding

- Ultra-lightweight EMI/RFI braiding for high-temperature applications: 400°C to 2300°C
- Microfilament stainless steel: 70% lighter than NCU A.A. 99569/QB575
- Outstanding EMI/RFI shielding and conductivity
- Aerospace environment qualified
- Superior flexibility and "windowing" resistance: 90 to 95% optical coverage
- 220,000 psi (min) tensile strength
- Best performing metallic braid during lightning tests (per the ANSYS EA-364-75-1997 Waveform S8)

Save weight and money every time you fly. All-Up Weight (AUW) has met its match. ArmorLite™ microfilament stainless steel braid saves pounds compared to standard QQ-B-375/A.A. 99569 EMI/RFI shielding. ArmorLite™ is an expandable, flexible, high-strength, conductive stainless steel microfilament material designed for use as EMI/RFI shielding in high performance interconnect cabling. The principal benefit of ArmorLite™ is its extreme light weight compared to conventional Nickel/Copper shielding. By way of comparison, 100 feet of 5/8 inch ArmorLite™ is more than four pounds lighter than standard 175 A.A. 99569 shielding. The ArmorLite™ offers superior temperature tolerance compared to lightweight non-metallic braiding such as AmberStrand™.

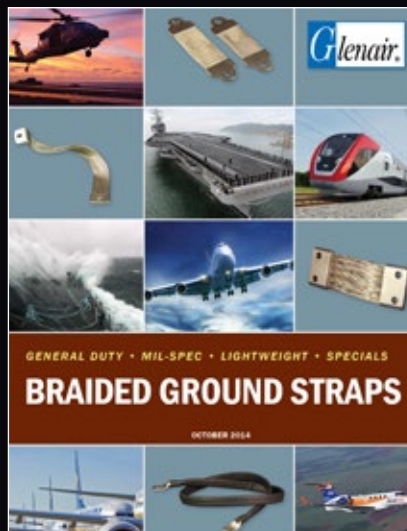

Glenair.

LIGHTWEIGHT AmberStrand™
Composite metal-clad EMI/RFI braided shielding
The smart way to reduce launch and flight weights in aerospace systems

- Metal-clad EMI/RFI shielding with a lightweight composite thermoplastic base material
- Highly conductive surface plating
- Reduce shielding weight up to 80% and more
- Reduce operation costs by permanently reducing launch and aircraft all-up weights
- Superior high frequency shielding compared to tin-plated and/or nickel plated copper
- Exceptional tensile strength: 590,000 psi (min)

For many applications, the cable shield is the most important element in controlling EMI. Unfortunately metal shielding—especially when applied in multiple layers—can be extremely heavy. The opportunity to provide robust EMI shielding at a fraction of the weight is the principal advantage of composite thermoplastic EMI/RFI braid made from AmberStrand™ material. Tensile impedance test reports demonstrate the effectiveness of the material compared to conventional metal solutions. So get smart. Reduce weight and save money with AmberStrand™.

BRAIDED GROUND STRAPS
OCTOBER 2014

ARMORLITE™ MESH TAPE

For spot EMI/RFI shielding coverage and reinforcement of cable interstices. MasterWrap™ with Nomex® available for mechanical / abrasion spot coverage and repair.

ARMORLITE™ AmberStrand®

LIGHTWEIGHT ARMORLITE™ (STAINLESS STEEL) AND AMBERSTRAND® (COMPOSITE) SHIELDING

Tubular AmberStrand® and ArmorLite™ lightweight metal-clad microfilament EMI/RFI braided shielding

Shield sock backshells with lightweight ArmorLite™ or AmberStrand® microfilament EMI/RFI braid

MasterWrap™ flexible, field-installable/repairable side-entry EMI/RFI shielding with ArmorLite™ technology. MasterWrap™ with Nomex® available for abrasion/thermal protection.

TURNKEY FACTORY OVERBRAIDING WITH LIGHTWEIGHT AND QQ-B-575B/A-A-59569 BRAID

Turnkey factory-overbraided multibranch cable assembly

Overbraided conduit assembly, ready for customer termination

Factory-overbraided pigtail assembly

ARMORLITE™ AND METALLIC BRAID GROUND STRAPS

Lightweight ArmorLite™ microfilament ground straps

Heavy-duty metallic braid ground straps

MIL-DTL-24749 Type IV Qualified navy ground straps

Round braid profile ground straps

INDUSTRY-STANDARD TUBULAR FABRIC AND METAL BRAID

Tubular fabric braid for mechanical and abrasion protection of electrical wire interconnect systems

Wide range of colored Nomex® for abrasion protection and wire identification

QQ-B-575B/A-A-59569 metallic braid for EMI shielding

High-temperature fiberglass braid for engine applications

Glenair Braiding and Weaving

WIRE PROTECTION AND SHIELDING

Complete vertical integration—the most capable braiding and weaving facility in the interconnect industry

Glenair operates the largest braiding and weaving operation in the interconnect industry, including over 50 Wardwell Rapid Braiders, looms, termination welders, as well as comprehensive electrical and mechanical testing equipment.

Glenair's braiding and weaving capability includes the fabrication of bulk tubular sleeves and wraps, as well as direct overbraiding services for complex cable and conduit wire harness assemblies
